19 ¹ / ₄ " x 75"	Model # LP-489	\$ 99.00
19" x 75"	Model # LP-483	\$ 99.00

We know that extra custom sized panels are needed at times and we can order and have them available in 7 business days.

The panels we carry are for installation with U channels. U channel installation is stronger than with glass clamps. If you would like installation with glass clamps this becomes a custom order and it will be more expensive.

Please note: take 1/4" off of the glass size for U channel installations.

Often the walls are not perfectly straight, with the U channel installations small adjustments are easy.

Our door sizes indicate the door opening needed. The measurement for necessary space for hardware and operating the door is taken off of the size of the glass.

Example 1. If your door opening from wall to wall measures 26" wide then our 26" door will fit perfectly. If your door opening is a bit wider a side sweeper is available.

Example 2. If your opening is 58" wide for the installation of 1 door and a panel you can order a 26" door and a 31 3/4" size panel (note 1/4" was removed for the U channel on side)
